

Community Engagement Commitment

At OmniMax, our purpose is to provide solutions to create, enhance, and preserve where we live, work, and play. In the spirit of this purpose, OmniMax is committed to being a good neighbor in the communities in which we do business and in which our associates live.

We believe in partnering with our local communities and supporting local businesses, and we support organizations that operate in a manner consistent with our values, such as local, veteran- and minority-owned business, and first responders. We demonstrate our support through volunteering, internships and product donations and participating in local community initiatives.

Volunteering

We proactively promote volunteerism while providing support, encouragement, and recognition to associates who work to make our communities better.

Donating products

As a leader in building materials and water management solutions, we recognize that our products can make a substantial impact in critical-needs shelters and in providing safe, efficient housing.

Product donations typically support

- Building and rehabilitating safe, efficient housing for those in need;
- Neighborhood improvement projects;
- Revitalization of shelters and community centers; and
- Disaster relief.

OmniMax also actively encourages our associates to be involved in sustainable practices in the communities in which they live and work.
